Cabernet Sauvignon / Cabernet Franc / Merlot / Blends: Cabernet is the noble red grape. The snooty one that does not care if you don't understand it. It just is. If Shiraz is a comfy t-shirt that fits all, then Cabernet is a formal designer jacket with sleek lines and makes no apology. If straight Cabernet is too austere, add Merlot in the mix for light amidst the shade.

Dessert Wines: Want a sweet way to end dinner? Noble Rot might sound like a debilitating fungal disease of the French royal court but it's the term to describe the natural debilitation of grapes that are left on the vine. Also known as Botrytis - it means the grapes dehydrate and turn to sugar while retaining acidity. Here's some examples from varieties of the Old World and the new.
